

Clear Cluster Inventory

Jabrail Ahmed

B2

3/5/14

My Clear Cluster Inventory was not a close tie many of the things had close relations with one and other My highest was Health Sciences and the other was Law and the other Government and many of those all interest me I enjoy hearing new medical news and law cases and many thing I hear about the government is every day.

I enjoy treating the sick and helping I could help by helping in court cases and I could fight for what is right in criminal case and if I were to work for the government I would be able to help in so many was I could fight for the American people and their rights will hopefully be prepared for anything many say the government does bad things for this country well if you thing about what had happened to this country you would notice why we would need the protection and have all the information and I would say they are pushing it a little too far and many would say that we need all of these areas in the future and I would enjoy being in anywhere of these three fields.
