I had many careers to choose from but many of the many choices I chose was Lawyer and I also had chosen Pediatrician so for this page summary I will be talking to you about what I have to do to be a Pediatrician.

Pediatrician:

Pediatricians need to know:

Basic Medicine

Anatomy and physiology

Clinical medicine

Examination and diagnosis

Patient communications and care

Medical ethics and law

Professional standards

Medication and drug properties

Laboratory and classroom learning

Properties of different drugs and medicine

Many Pediatricians go to Internships so they see what the professionals do so that when they go to the work field they know a little bit of experience and they know what many of the tricks to much of the medicine.

They will take a bachelor's degree and then they must go to medical school afterwards.

Money: yearly 154,650 that is how much I would make in the United States.
